FOOT PULSE ACU

FOOT PULSE ACU

Foot Pulse ACU is a 30 minutes auto-programmed electrical impulse therapy. It is based on the combination of 12 different Transcutaneous Electrical Nerve Stimulation programs with up to 99 level of intensity.

How Does It Work

When one places feet on it, mild and stimulating electrical pulses pass from the surface of the skin to the nerve endings. At this juncture, it blocks the pain messages from reaching the brain which reduces the pain quickly. Also, the natural pain killing hormones endorphins are stimulated that along with fighting pain induce feel-good chemicals and make you feel happy and excited.

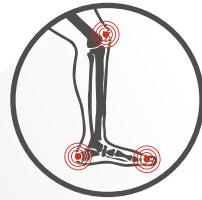

Foot Pulse ACU

Benefits Of Foot Pulse ACU

- Relief Tingling or Numbness In Feet Area

- Reducing Knee pain, Heel Pain or Calf Pain

- Reducing Severe Feet Pain

How To Use ?

STEP#1
Plug the power cable into the nearest electricity socket and the power input of the device.

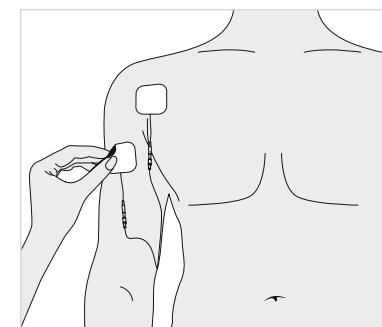

STEP#2
Sit down on a chair or a sofa and place your both bare feet on the foot shaped pad of the device.

STEP#3
To turn the device ON, press the power button on the device or the remote control. Adjust the intensity through -/+ button.

STEP#4
Connect the electrode pads with the connecting wire. Now plug this wire into the accessories socket on the device.

STEP#5
Peel off the protective membrane from the body pads and carefully place them on the clean, dry, uninjured skin.
