Body Pulse Next

Body Pulse Next is an innovative home healthcare device. It is designed and developed with the combination of Smart EMS (Electrical Muscle Stimulation) and TENS (Transcutaneous Electrical Nerve Stimulation) technology. The device is auto programmed with these therapies to provide instant pain relief and also helps to restore your muscle strength in just 30 minutes on daily use.

With EMS therapy it sends electrical impulses to provide contraction and expansion to the muscle areas. With this motion it provides relaxation to the muscle, strengthens the muscle and also increases the blood flow in your body. Better blood flow helps in providing adequate oxygen and nutrients to your body that keeps all muscles active in a sedentary lifestyle.

TENS technology sends mild electrical impulse to block the pain signals from reaching towards the brain and reduces the pain sensation. The stimulation by electrical impulse also helps to release a natural pain-relieving hormone called Endorphins which gives a sense of relief to the person from pain.

How to use it ?

- 1** Charge the Device
- 2** Sit comfortably and relax
- 3** Place your bare feet on the conductive foot pad
- 4** Switch on the device and select the program (P1) EMS & (P2) TENS
- 5** Adjust the intensity as per your convenience
- 6** Use the additional electrode patches on the body parts where you may have pain.
Do not apply pads directly on bones / joints

- › Provides relief in Osteoarthritis
- › Provides relief in Diabetic Foot Pain i.e. Tingling, Numbness and Burning Sensation

They **used it.**
They **said it.**

My feet used to get numb very frequently. It severely hampered my mobility and made me feel like a burden on my family because I would fall unexpectedly and get hurt. I tried various therapies and medication but was not happy until I started using 'Body Pulse Next'.

I just use it half an hour every morning and I don't experience numbness in my feet for the day. This is an amazing product.

Jivan More,
Pune, India

My mobility was reduced soon after my 75th birthday because walking started tiring me more and less walking gave me painful feet which worsened my case.

I suffered for two years before I found 'Body Pulse Next'. After initial encouraging results, I religiously started using it daily and sometimes twice. 'Body Pulse Next' has been a friend in need and indeed.

James Madison,
London, UK.

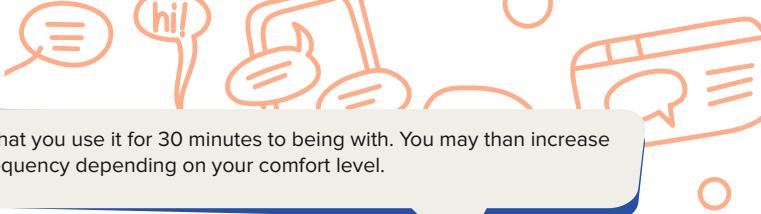

Blood circulation in my body was not adequate because of which I used to suffer from slow recovery from injuries and frequent and painful clots with or without any injury.

That was until 'Body Pulse Next' came into my life. After initial few days of using it, I noticed that the clots would go away faster and the frequency of their occurrence became lesser. Not only that, my injuries also started healing faster. Not to mention, the pain was also considerably reduced. I am very happy with 'Body Pulse Next'.
